

Gloves

Black Nitrile

Abena's black nitrile glove is aimed at hairdressers, tattoo artists and the food industry.

The gloves are soft and comfortable to wear and ensures a steady and firm grip.

The gloves have been tested for permeation of chemicals and are approved as protective gloves.

Furthermore, they are approved for the food industry and for medical use, protecting the user against viruses and bacteria.

The glove is
available in sizes
XS - S - M - L - XL

Fields of application

- Hairdressers
- Tattoo artists
- The food industry
- Protection against chemicals, viruses and bacteria

Features

- Powder-free
- Micro-textured fingertips
- Rolled cuffs
- Soft and comfortable to wear

Specifications

Chemical	CAS	Permeation time	Class
1-Propanol	71-23-8	5 min.	0
2-Hydroxyethyl Methacrylate 97%	868-77-9	5 min.	0
Acetone	67-64-1	0,13 min.	0
Chlorhexidine 4%	18472-51-0	>480 min.	6
Chlorhexidine Digluconate 20%	18472-51-0	>480 min.	6
Diurethane Dimethacrylate	72869-86-4	242 min.	5
Ethanol 35%	64-17-5	46 min.	2
Ethanol 70%	64-17-5	16 min.	1
Ethidium Bromide	1239-45-8	>480 min.	6
Phenol 90%	108-95-2	<9 min.	0
Formaldehyde 10%	50-00-0	>480 min.	6
Formaldehyde 35%	50-00-0	>480 min.	6
Formaldehyde 4%	50-00-0	>480 min.	6
Glutaraldehyde 1%	111-30-8	>480 min.	6
Hydrogen Peroxide 3%	7722-84-1	>480 min.	6
Hydrogen Peroxide 30%	7722-84-1	>480 min.	6
Isopropanol	67-63-0	22 min.	1
